

Customer Notification

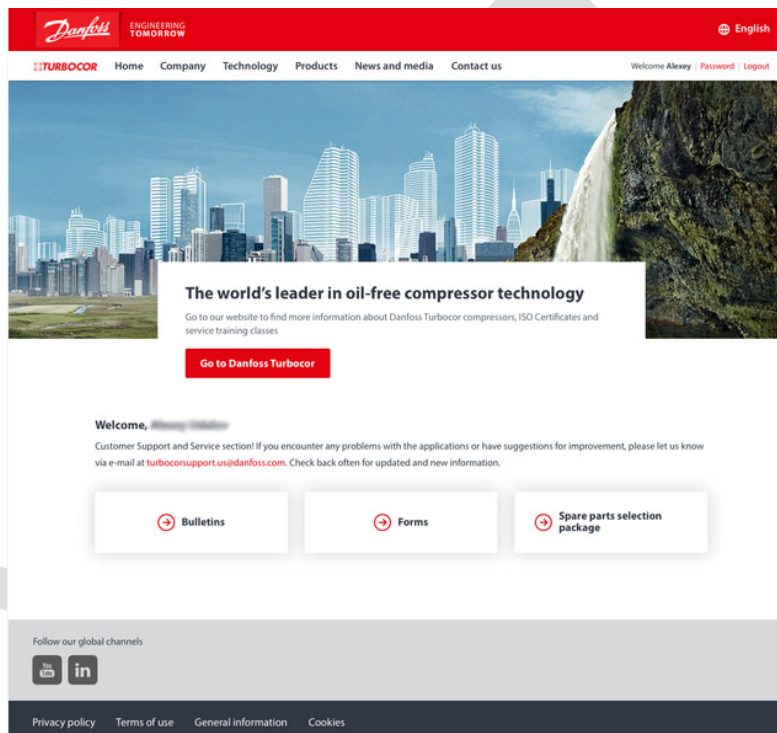

B-CN-128-EN Rev A

7/26/2018

SUBJECT: New DTC Website

Purpose

This is to inform our customers that the current Danfoss Turboacor Compressors, Inc. (DTC) Customer Support and Service section of the website will soon be replaced with a new, more user-friendly website. The new website is intended to provide a better user experience as well as to better align DTC with our plans for future enhancements. The new website will initially be available in English, and a Chinese option will be rolled out later this year.

Summary

With the move to the new website, all users will need to re-register for access, even if you already have access to the old site.

We anticipate the website will go live by September 1st. Our current website will remain operational for a short period during this change in order to provide document access to our current customers. We will send out a follow-up bulletin providing further details as well as information regarding how to register for the new site.

Action Required

Please contact your customer service representative (turbocor.cs.na@Danfoss.com) or your Key Account Manager if you have any questions.
